**Subject:** Requested Response to Commissioners about Order 2013-238

Dear Commissioner Howard and All Public Service Commissioners,

Per your request for the parties to Dockets 2005-385-E, 2005-386-E, and 2008-196-E, as a party to two of these dockets, I believe the best method of holding discussion on encouraging renewable energy should be through a series of workshops. If anyone has requested any ex-parte presentations or briefings, all the parties should be invited to attend these as well.

Indeed, not only should the parties to these dockets participate in the workshops and any ex-parte briefings, but also the stakeholders, the installers of renewable energy devices and means, logically should be invited to be full participants, and even leaders of workshops, as they can educate through the series of workshop formats.

Personally, I would also like to make a presentation, though I am not an expert, I have some suggestions to offer in a semi-formal (Ye old Power Point!) fashion.

Please let me know which Commissioner takes the lead for renewables at the NARUC meetings either as a committee members or chair.

Also please give us an idea of the proposed timing or scheduling of discussions, workshops, presentations, etc. about these all-important issues.

Thank you so much for your wise foresight to get ahead on the issue before these dockets are formally revisited.

Sincerely,

Pamela Greenlaw
